

separator-rule package

Fernando Pujaico Rivera

May 8, 2022

Abstract

Creates macros to show separator rules

1 Install package

Put the `separator-rule.sty` file in any of this location

- Put the `separator-rule.sty` file in the same path of main tex file.
- Execute the command:

```
kpsewhich -var-value=TEXMFHOME
```

and this returns the path of local tex files. By example if returns

```
/home/username/texmf
```

then, put the `separator-rule.sty` file in the directory.

```
/home/username/texmf/tex/latex/separator-rule/separator-rule.sty
```

2 Load the package

To load the package use the next command in the preamble of main tex document.

```
\usepackage{separator-rule}
```

3 Using the package

Next, they are shown some examples use of all macros in the package.

```
\lipsum [1][1-4]
```

```
\HRule {2pt}
```

```
\lipsum [1][1-4]
```
